Mixing Console for iPod™

iTrax

Introducing the new iTrax Mixing Console for the Apple® iPod™. This innovative unit features two angled docking stations, each designed for the iPod™ Portable Music Player, allowing users to set two iPods™ side by side for a mixing experience like no other. With video-enabled iPod™ compatibility, a USB port, and input selection switches for added versatility, the iTrax Mixing Console for iPod™ debuts as the perfect solution for anyone who wants to mix up the party using the World's favorite Digital Music Player.

- Dual docking stations for Apple® iPod™ Digital Music Players
- USB port with dock switch allows library management via PC
- 2 Phono/Line convertible inputs for use with additional devices
- Composite video output for use with photo/video-enabled iPod™
- 3-Band rotary EQ with gain and cut feature per channel
- 1/4" (6.35mm) Mic input with 2-Band EQ controls
- Master and Record RCA outputs
- Cue section with CH1/CH2/Mix cue fader
- User replaceable X-Fader
- Lightweight, slim line design for complete portability
- Dock converters for all iPod™ models (except iPod Shuffle)

GEMINIDJ.COM

The mixing console features two angled docking stations that function like a standard dock, allowing the user to charge their iPod™ and edit their collection via USB connection. The angle positioning also gives the user easy access to the iPod's™ controls while mixing.

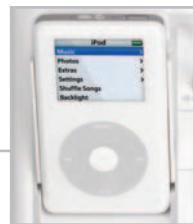

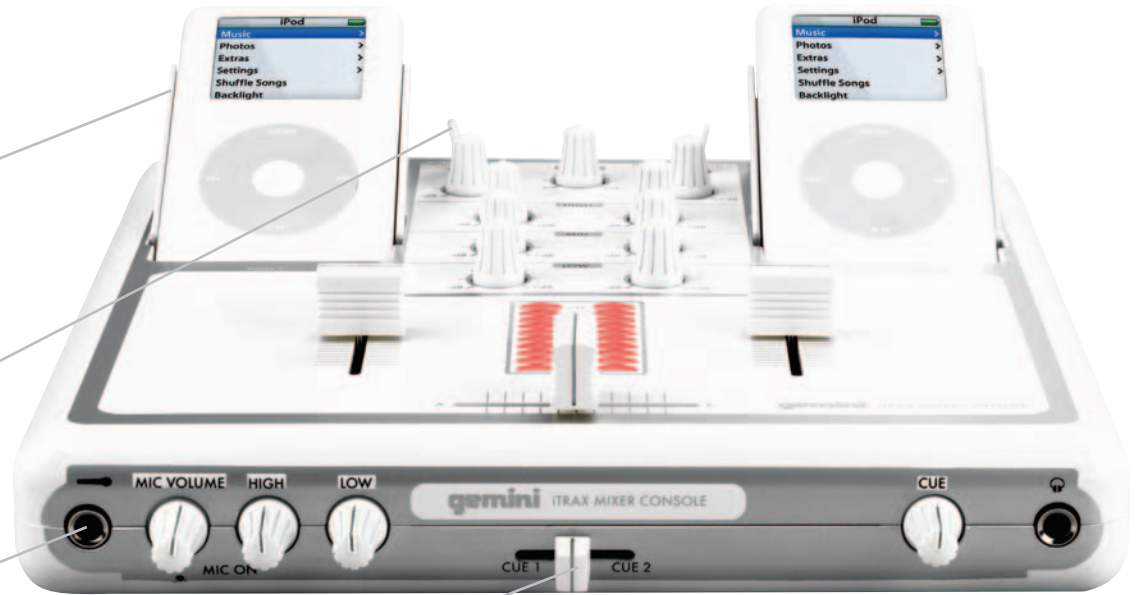

The iPod™/Input switch lets the user add additional equipment to their iPod™ mixing set up, such as a CD Player or a Turntable. A simple flick of a switch will toggle between the iPod™ and a connected device.

The console comes equipped with a 1/4" microphone input with volume and 2-band EQ control.

The cue section allows the user to set the headphone volume as well as choose which channel comes through the headphones, making for an effective mix monitoring solution.

The back panel of the iTRAX features both a composite video output which allows video-enabled iPods™ to send video and a USB port so users can connect a computer to edit their music collections through iTunes™.

The iTRAX also includes Dock Converters to fit all iPod™ models (except iPod Shuffle™).
